

Guided Technical Practice (NETLAB2 – Mustafa Dryosh)

The screenshot displays the NETLAB2 web interface. The browser address bar shows `netlab05.fscj.edu/lab.cgi`. The page header includes the FSCJ logo and navigation links: Home, Reservation, and a user profile for SZsec140. The main content area shows a breadcrumb trail: MyNETLAB > NDG Seurity+ v4 POD 1202 > Reservation 49235 > Lab 06: Vulnerability Checks with OpenVAS. A timer in the top right corner indicates 09 minutes remaining. Below the breadcrumb, there are buttons for Topology, Content, Status, and a dropdown menu for Kali. The central part of the screen shows a terminal window with the Greenbone Security Assistant (Mazda Probe) interface. The terminal displays the result of a vulnerability check: "Result: Redis Server No Password". The result table shows a severity of 100%, a host of 127.0.0.1, and a location of 6379/tcp. The summary states: "The remote Redis server is not protected with a password." The vulnerability detection result notes that the vulnerability was detected according to the Vulnerability Detection Method. The impact states: "This issue may be exploited by a remote attacker to gain access to sensitive information or modify system configuration." The solution type is listed as "Workaround" with the instruction "Set password." The vulnerability insight notes: "It was possible to login without a password." The vulnerability detection method is "Evaluate if the remote Redis server is protected by a password." The details include "Redis Server No Password (DB: 1.3.6.1.4.1.25623.1.0.105291)" and "Version used: 5.0.7". The product detection result is "Redis 5.0.7".

Lab 6-completion page

The screenshot displays the NETLAB2 web interface. The browser address bar shows `netlab05.fscj.edu/lab.cgi`. The page header includes the FSCJ logo and navigation links: Home, Reservation, and a user profile for SZsec140. The main content area shows a breadcrumb trail: MyNETLAB > NDG Seurity+ v4 POD 1201 > Reservation 49240 > Lab 07: Performing Active Reconnaissance. A timer in the top right corner indicates 23 minutes remaining. Below the breadcrumb, there are buttons for Topology, Content, Status, and a dropdown menu for Kali. The central part of the screen shows a terminal window with the Nmap scan results for the host 172.17.0.1. The terminal output includes the following information:

```
kali@kali:~$ nmap -sV -oN /tmp/nmap.nmap 172.17.0.1
Nmap scan report for netlab05 (172.17.0.1)
Host is up (0.0012s latency)
Not shown: 991 filtered ports
PORT      STATE SERVICE
22/tcp    open  ssh
25/tcp    open  smtp
80/tcp    open  http
110/tcp   open  pop3
143/tcp   open  imap
443/tcp   open  ssl/http
993/tcp   open  ssl/imap
995/tcp   open  ssl/pop3
Service Info: Hosts: ubuntu05-netlab05, ubuntu05-netlab05, 05: Linux; CPE: cpe:/o:linux:linux_kernel
```
